Specifications: Smart Amp Mounting hardware included

Regulatory - CCC

approved

Description

The Smart Amp is an automatic volume control unit. The Smart Amp acts as an unseen staff member, automatically adjusting the volume of any player as the surrounding room noise goes up and down. Volume of your Secret Sound speaker will stay consistent even as a brass band goes by! The Smart Amp “listens” to the room through a small remote microphone, and adjusts the player volume as needed to retain your setting. The Smart Amp also includes an internal 6-watt amplifier that is sufficient to power a Secret Sound speaker, making it the perfect system for unamplified computer audio output. Installation is easy, and you need only to provide speaker wire to connect the Smart Amp to your sound source and the remote microphone.

Patented SoundTube Technologies

SoundTube and MSE Audio Group constantly develop new technologies that enhance audio product performance. SoundTube innovations are protected by multiple U.S. and

international patents, which explicitly cover SoundTube dispersion, enclosure and dome technologies. MSE Audio Group actively defends its patents in order to protect SoundTube resellers and end users.

Technical Data and Specification Tools

Technical Data

SoundTube Entertainment strives to provide complete and effective technical information and data to dealers, engineers and designers. All data are available from SoundTube Entertainment or at www.soundtube.com. Technical data and downloads include: EASE™ data - 3-D polar plots. EASE™ Address - 2-D modeling for distributed systems Autodesk® Revit® software Tech Sheets - Technical information and architectural specs for system engineers SoundTubeSPEC™ - Proprietary speaker placement software

Data Acquisition and Verification

All data for SoundTube speakers are independently

collected from and verified by NWAALabs (www.nwaalabs.com) using their proprietary MACH testing system. All data are collected and analyzed according to ASTM, ISO and AES standards using EASRA, TEF and MLSSA. Full balloon data including both phase and magnitude are compiled into a variety of formats including EASE 4.x, GLL and CLF.
