Description

The RS31-EZ-T is a premium full-range 3 inch pendant-mount speaker, with overall dimensions smaller than a 4 inch sphere. The RS31-EZ-T incorporates a 10 ft length of speaker hanging cable for on-ceiling applications. Components have been weatherized for indoor/outdoor applications.

The RS31-EZ-T is an 8 ohm speaker with a 20W transformer inside the mounting element. The speaker utilizes the all-in-one ceiling mount system designed to retrofit in most j-boxes. Cover plate is included to hide mounting element and hold excess signal/hanging cable.

Applications

Engineered for rapid installation and low profile mounting for smaller venues, the RS31-EZ-T is ideal for finished ceiling applications in retail, restaurants, conference rooms, patio areas, educational facilities or any setting where full-range intelligibility, unobtrusive design and installation ease are paramount. For additional bass response down to 41 Hz (-10 dB), the SM1001p powered 10-inch subwoofer may be incorporated.

Architectural Specifications

The loudspeaker transducer shall consist of one full-range 76.2 mm (3.0 in.) polypropylene cone with butyl rubber surround.

Performance specifications for a typical production unit shall be as follows: Useable frequency response shall extend from 120 Hz – 22 kHz (- 10 dB). Measured sensitivity (2.83 volt input, 1 meter) shall be at least 85.0 dB. The speaker shall have a nominal impedance of 8 ohms, with a 20-watt transformer for distributed systems. The transformer shall have a selectable terminal input strip for 25-, 70.7- and 100-volt applications. Rated power capacity shall be at least 20 watts continuous (RMS) and conform to EIA-426-B. Maximum continuous power output at 1 meter shall be 98 dB.

Installation shall be by mounting element designed to retro-fit in most junction boxes. The speaker will hang via 10 foot signal/hanging cable (included). Cover plate is included to store excess signal/hanging cable as it is screwed into place, concealing the mounting element and junction box. The 20-watt transformer will be mounted directly inside the mounting element. The speaker utilizes weatherized components for indoor and outdoor applications.

External wiring shall be by low-profile screw terminal and shall accept from 10 – 22-gauge wire.

The enclosure shall be constructed of injection-molded, ABS. The grille shall be constructed of powder-coated aluminum for lasting performance and affix to the speaker baffle via pressure fit. Overall cabinet dimensions shall be no more than 110.5 mm (4.35 in.) in height by 110.5 mm (4.35 in.) in diameter. The unit height with stabilizing arm shall be no more than 139.7 mm (5.5 in.).

The system shall be the RS31-EZ-T for high-impedance applications.
